The following seven tables represent the COFRS chart of accounts as of February 28, 2004. The fund table is presented twice using different sort orders; the first sort is based on the fund number while the second sort is based on fund group, type, and category. In all seven tables, items that have changed since the previous year's Fiscal Procedures Manual are bolded and highlighted. Because of the large number of new transfer codes that are established annually, additions to the alpha transfer codes are not bolded or highlighted except in those limited instances where an alpha code has been used to track the balancing of a clearing type account.
